WEBSITE

spathare21.github.io

LOCATION

Pune, India

TECHNICAL SKILLS

Automation

Selenium, Robot FW, Cypress, Appium
Pytest, JUnit, TestNG, Cucumber/BDD

Languages

Python, Java, JavaScript, SQL
Shell/Bash, Groovy

AI & LLM

LLM Integration, Cursor, Claude
Copilot, Prompt Engineering

DevOps & CI/CD

Jenkins, GoCD, Docker, Kubernetes
Terraform, Git, Maven, AWS

Performance & Security

Gatling, JMeter, Load/Stress Testing
OWASP Validation

EDUCATION

MCA — Master of Comp. Applications

D.Y. Patil Institute, Pune
Savitribai Phule Pune University
2012 – 2015

B.Sc. — Computer Science

MIT College of Engineering, Pune
Pune University
2008 – 2011

CERTIFICATIONS

- ISTQB — Foundation Level
- RHCSA & RHCE — Red Hat
- Red Hat: Containerised App Dev

Sachin Pathare

Staff SDET (MTS 5)

Quality Engineering · AI Test Automation · Pune, India

PROFESSIONAL SUMMARY

Staff SDET with **12+ years** building enterprise-grade quality at scale across SaaS, data security, cloud, fintech, and platform domains. Led **7–8 member QA teams** across multiple squads, established AI-powered triage and test-plan workflows cutting manual effort by **60%+**, and consistently delivered measurable improvements to release quality and engineering standards. Treats automation code as production-quality deliverable.

PROFESSIONAL EXPERIENCE

Cohesity · Hybrid, Pune

Jun 2023 – Present

Staff SDET (MTS 5)

Promoted: MTS 4 (Jun 2023) >> MTS 5 (Oct 2025)

- Led and mentored a **7–8 member QA team** across 3 product squads, improving planning discipline, Definition-of-Done alignment, and on-time quality delivery.
- Architected an **AI-powered test triage system and automated test-plan generator** using LLM integrations, reducing manual triage effort by **60%+** and accelerating release cycles.
- Standardised practical use of **Cursor and Claude** for automation scripting, test-plan drafting, and flaky-failure triage — establishing org-wide AI usage standards for QA.
- Contributed **MCP-based triage workflows**: fetching automation history, scanning logs, and delivering actionable failure notifications via email alerts.
- Built an automation **execution dashboard** surfacing run history, stability trends, and failure insights to improve release confidence across all squads.
- Established monthly **defect pattern analysis** to convert field/production issues into preventive regression scenarios and framework improvements.
- Owned end-to-end quality strategy for a data-protection SaaS platform: test plans, automation frameworks, regression suites, and CI/CD-integrated pipelines.

AI Automation / Team Leadership / CI/CD / Data Security SaaS

Druva Data Solutions Pvt Ltd

Apr 2021 – Jun 2023

Senior SDET

- Owned end-to-end automation for **Microsoft 365, Google Workspace, and Slack** integrations using Robot Framework and Python — covering cloud backup and recovery scenarios.
- Defined sprint-level test strategies; collaborated with POs and engineers on acceptance criteria, desk checks, and release demos.
- Improved automation coverage and significantly reduced manual regression effort across integration releases.

Robot Framework / Python / M365 / Google Workspace

Quality Analyst

- Delivered **BDD automation** (Java, Serenity, JUnit, Gradle) for McKinsey & GPN client programs; championed shift-left quality through story kickoffs, acceptance criteria, and desk checks.
- Implemented **Gatling performance test suite**; identified API bottlenecks that drove measurable improvements in system response times.
- Contributed to unit and integration testing alongside developers, treating quality as a shared team responsibility.

BDD / Java / Serenity / Gatling / Shift-Left

Red Hat India Pvt Ltd

Nov 2016 – Jun 2019

Quality Engineer

Promoted: Associate QE (Nov 2016) >> Quality Engineer (Nov 2017)

- Automated **RHEL i18n test scenarios** in Python and OpenQA, validating 20+ locales across major Red Hat product releases.
- Built Selenium + Java automation for Zanata, Transtats, and Satellite web UIs; validated REST APIs with RestAssured.
- Contributed open-source code to Transtats and Zanata projects; maintained test plans across product release cycles.

Python / Selenium / OpenQA / i18n/L10n / Open Source

Vertis Infotech

Oct 2015 – Nov 2016

Software Engineer – Test

- Designed and built a **Selenium + Java + REST-Assured automation framework from scratch** for a fintech/payments product — covering end-to-end UI flows, API contract validation, and payment transaction scenarios.
- Developed **mobile SDK test automation** for Android and iOS using Appium, validating cross-platform SDK behaviour across multiple device configurations.
- Executed structured test cases for payment flows, session handling, and error boundary scenarios; actively managed defects through the full lifecycle in JIRA.
- Participated in sprint ceremonies, release readiness reviews, and exploratory testing sessions to ensure quality across agile delivery cycles.

Selenium / Java / REST-Assured / Appium / Fintech

PTC India

Jun 2014 – Jun 2015

Software Engineer – Intern

- Performed manual and automated validation for a **PLM (Product Lifecycle Management)** platform; planned and executed regression test cycles covering key product workflows.
- Authored test cases, test plans, and defect reports using standardised QA documentation practices, ensuring traceability from requirements to test coverage.
- Collaborated with senior QA engineers and developers to translate product requirements into structured test scenarios and identify edge cases.
- Gained foundational experience in software QA processes, defect lifecycle management, test design techniques, and agile team participation.

PLM / Manual Testing / Test Design / QA Fundamentals
