

Sachin Pathare

Staff Software Engineer (MTS 5) | Quality Engineering and Test Automation Leader

Pune, India | sachinpathare@gmail.com | linkedin.com/in/sachin-pathare-b76b8496 | github.com/spathare21

12+ years of experience across SaaS, data security, cloud, fintech, and platform engineering.

Professional Summary

- Staff Software Engineer leading quality engineering strategy for enterprise SaaS products, with deep experience in UI, API, mobile, and performance automation.
- Built and scaled AI-assisted quality workflows for triage, test planning, and automation maintenance to improve engineering velocity and release confidence.
- Known for leading high-performing QA teams, improving standards, and reducing escaped defects through customer-scenario-driven testing.

Leadership Impact

- Led and mentored a 7-8 member QA team across multiple squads, improving planning discipline and on-time quality delivery.
- Established higher quality standards using review checklists, reusable automation patterns, and stronger Definition-of-Done practices.
- Introduced monthly defect analysis for field and production issues; converted findings into preventive regression scenarios and framework updates.
- Drove cross-functional quality partnerships with Product Owners and engineering leads to close quality gaps early in the release cycle.

Core Skills

Automation: Selenium WebDriver, Robot Framework, Cypress, Appium, Pytest, JUnit, TestNG, Cucumber/BDD

Languages: Python, Java, JavaScript, SQL, Shell/Bash, Groovy

AI and Productivity: LLM integrations, Cursor, Claude, GitHub Copilot, AI triage and test-plan generation

DevOps and Platforms: Jenkins, GoCD, Docker, Kubernetes, Terraform, Maven, Gradle, Linux

Performance and Security: Gatling, JMeter, load testing, stress testing, OWASP-focused validation

Professional Experience

Cohesity | Staff Software Engineer (MTS 5) | Hybrid, Pune | Jun 2023 - Present (Promoted from MTS 4 in Oct 2025)

- Architected AI-powered triage and test-plan generation workflows using LLM integrations, reducing manual triage effort by 60%+ across three product squads.
- Standardized practical usage of Cursor and Claude for automation scripting, test plan drafting, and triaging flaky automation failures.
- Addressed testing gaps by adding customer scenarios derived from field issues and production defects into release validation suites.
- Contributed to an automation execution dashboard showing run history, stability trends, and failure insights for release decisions.
- Contributed to MCP-based triage workflows that fetch automation history and trigger failure notifications using log scanning and email alerts.
- Owned end-to-end quality strategy for a data-protection SaaS platform spanning test plans, regression suites, and CI/CD-integrated frameworks.

Druva Data Solutions Pvt Ltd | Senior SDET | Apr 2021 - Jun 2023

- Owned automation for Microsoft 365, Google Workspace, and Slack integrations using Robot Framework and Python.
- Defined test strategies and sprint-level test plans; collaborated on acceptance criteria, desk checks, and release demos.
- Improved automation coverage and reduced manual regression effort for cloud backup and recovery scenarios.

Thoughtworks Technologies India Pvt Ltd | Quality Analyst | Jun 2019 - Mar 2021

- Delivered BDD automation using Java, Serenity, JUnit, and Gradle for client programs.
- Implemented Gatling performance tests and identified API bottlenecks to improve response times.
- Promoted shift-left quality through story kickoffs, acceptance criteria reviews, and desk checks.

Red Hat India Pvt Ltd | Quality Engineer | Nov 2016 - Jun 2019

- Automated RHEL i18n test scenarios in Python and OpenQA for 20+ locales across major releases.
- Built Selenium + Java automation for web UI systems and validated APIs with RestAssured.
- Contributed to open-source code and test planning across product release cycles.

Vertis Infotech | Software Engineer - Test | Oct 2015 - Nov 2016

- Built an automation framework from scratch using Selenium, Java, and REST-Assured for UI and API testing.
- Developed mobile SDK automation on Android and iOS using Appium.

PTC India | Software Engineer Intern | Jun 2014 - Jun 2015

- Performed manual and automated validation for a PLM platform and supported regression cycles.

Education and Certifications

Bachelor of Engineering, Computer Engineering | University of Pune | 2010 - 2014

Certifications: ISTQB, RHCSA, RHCE, Red Hat Certified in Containerized Application Development
