Staff SDET (MTS 5) | Quality Engineering and Test Automation

12+ Years	7-8 Team	60%+ Triage Savings
-----------	----------	---------------------

12+ years of experience across SaaS, data security, cloud, fintech, and platform engineering. Strong focus on automation quality, release reliability, and scalable testing practices.

PROFESSIONAL SUMMARY

- Staff SDET (MTS 5) owning quality engineering strategy for enterprise SaaS products, with deep experience in UI, API, mobile, and performance automation.
- Built and scaled AI-assisted workflows for triage, test planning, and automation maintenance to improve engineering velocity and release confidence.
- Managing a 7-8 member QA team across multiple squads with focus on predictable delivery, quality standards, and reduced escaped defects.

TEAM MANAGEMENT AND QUALITY IMPACT

- Managing and mentoring a 7-8 member QA team across squads to improve planning discipline and on-time quality delivery.
- Established quality standards with review checklists, reusable automation patterns, and stronger Definition-of-Done alignment.
- Addressed testing gaps using customer scenarios based on field and production issues.
- Institutionalized monthly defect analysis and converted findings into preventive regression scenarios and framework updates.

CORE SKILLS

Automation: Selenium WebDriver, Robot Framework, Cypress, Appium, Pytest, JUnit, TestNG, Cucumber/BDD
Languages: Python, Java, JavaScript, SQL, Shell/Bash, Groovy
AI Workflows: LLM integrations, Cursor, Claude, GitHub Copilot, AI triage, AI test-plan generation
DevOps and Platforms: Jenkins, GoCD, Docker, Kubernetes, Terraform, Maven, Gradle, Linux
Performance and Security: Gatling, JMeter, load testing, stress testing, OWASP-focused validation

PROFESSIONAL EXPERIENCE

Cohesity Staff SDET (MTS 5)	Hybrid, Pune Oct 2025 - Present
• Built AI-powered triage and test-plan workflows using LLM integrations, reducing manual triage effort by 60%+ across three product squads. • Standardized practical use of Cursor and Claude for automation scripting, test plan drafting, and triaging flaky automation failures. • Contributed to automation execution dashboards showing run history, stability trends, and failure insights for release decisions. • Contributed to MCP-based triage workflows to fetch automation history and notify failures using log scanning with email alerts. • Owned quality strategy for a data-protection SaaS platform spanning test plans, regression suites, and CI/CD-integrated frameworks.	

Cohesity | Senior SDET (MTS 4)

Hybrid, Pune | Jun 2023 - Sep 2025

- Built and scaled regression automation suites across multiple squads to improve release readiness.
- Partnered with product and engineering teams to strengthen acceptance criteria, risk-based coverage, and release sign-off quality.
- Introduced customer-scenario validation and defect pattern analysis to reduce escaped defects in subsequent releases.

Druva Data Solutions Pvt Ltd | Senior SDET

Apr 2021 - Jun 2023

- Owned automation for Microsoft 365, Google Workspace, and Slack integrations using Robot Framework and Python.
- Defined sprint-level test strategies and collaborated on acceptance criteria, desk checks, and release demos.
- Improved automation coverage and reduced manual regression effort for cloud backup and recovery scenarios.

Thoughtworks Technologies India Pvt Ltd | Quality Analyst

Jun 2019 - Mar 2021

- Delivered BDD automation using Java, Serenity, JUnit, and Gradle for client programs.
- Implemented Gatling performance tests and identified API bottlenecks to improve response times.
- Advanced shift-left quality through story kickoffs, acceptance criteria reviews, and desk checks.

Red Hat India Pvt Ltd | Quality Engineer

Nov 2017 - Jun 2019

- Automated RHEL i18n test scenarios in Python and OpenQA for 20+ locales across major releases.
- Built Selenium + Java automation for web UI systems and validated APIs with RestAssured.
- Contributed to open-source code and release test planning across product cycles.

Red Hat India Pvt Ltd | Associate Quality Engineer

Nov 2016 - Oct 2017

- Contributed to test execution and automation coverage for Red Hat product releases in a Linux-native environment.
- Supported i18n and web test validation efforts and collaborated with the team on release-quality checkpoints.

Vertis Infotech | Software Engineer - Test

Oct 2015 - Nov 2016

- Built an automation framework from scratch using Selenium, Java, and REST-Assured for UI and API testing.
- Developed mobile SDK automation on Android and iOS using Appium.

PTC India | Software Engineer Intern

Jun 2014 - Jun 2015

- Performed manual and automated validation for a PLM platform and supported regression cycles.

EDUCATION AND CERTIFICATIONS

Bachelor of Engineering, Computer Engineering | University of Pune | 2010 - 2014

Certifications: ISTQB, RHCSA, RHCE, Red Hat Certified in Containerized Application Development
